

Last Opportunity to Apply for Capital Incentive to Generate Electricity from the Sun

House which generates electricity from the sun. 10kWp BIPV bungalow at Kajang, Selangor.

National SURIA 1000 Programme

SURIA 1000 is a national renewable energy (RE) programme which offers capital incentives to install Building Integrated Photovoltaic (BIPV) systems at residential and commercial properties. The BIPV system will generate clean and renewable electricity from the sun. Under the final call for SURIA 1000, public can bid to receive maximum of 42% rebates for the total BIPV equipment and installation costs.

The SURIA 1000 is part of the Malaysia Building Integrated Photovoltaic (MBIPV) Project, being implemented by Pusat Tenaga Malaysia (PTM) under the 9th Malaysia Plan (9MP) for the Ministry of Energy, Green Technology and Water, with support from Suruhanjaya Tenaga, United Nations Development Programme (UNDP) and Global Environment Facility (GEF). The objective of MBIPV Project is to reduce the long-term cost of BIPV technology by creating a sustainable and widespread BIPV market. The growing BIPV market can then reduce CO2 emissions, address long-term energy supply security and create a new industry for the country.

Q. How can I participate in the SURIA 1000?

Read and understand the guidelines. The application form, complete guidelines, terms and conditions can be downloaded from the MBIPV website (<http://www.mbipv.net.my/suria.htm>). Then, contact an approved PV service provider to get a quotation for the optimum BIPV system your premise.

Q. How do I find a PV service provider?

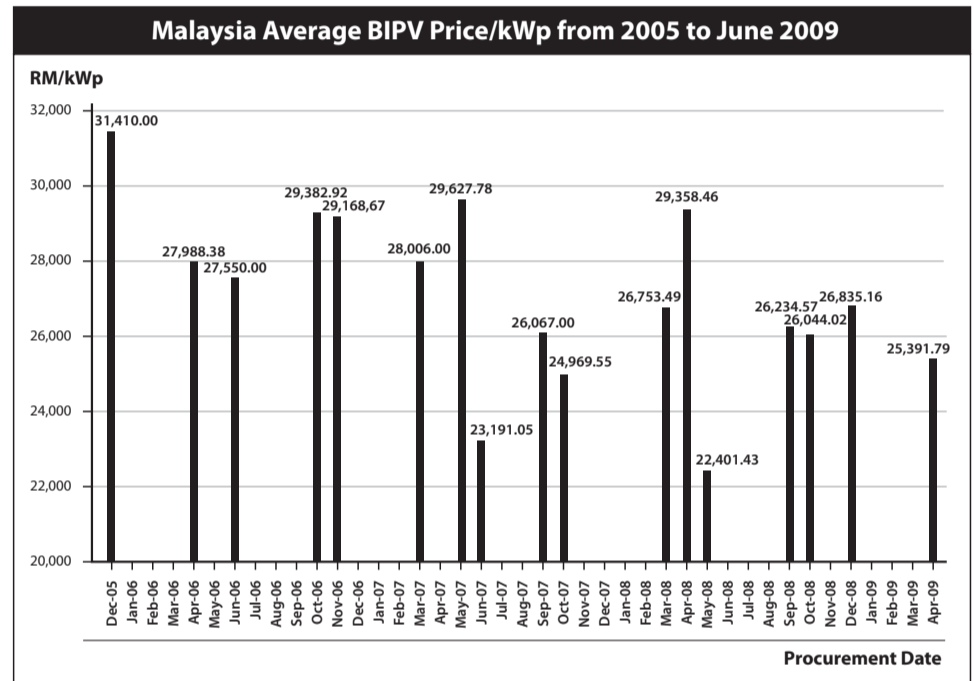

The list of approved PV service providers is available at PTM's website, <http://www.mbipv.net.my/APVPS.html>

Q. What is the total PV capacity available in this final bid?

340kWp in total will be offered. Each residential application can bid for a minimum of 3kWp and maximum of 10kWp. Commercial application must not exceed 30kWp.

Q. How much do PV systems cost?

Please visit <http://www.mbipv.net.my/price2.html> for the latest local PV pricing trend.

Q. Are there any other government incentive to encourage the use of PV?

- i) The Budget 2009 has extended import duty and sales tax exemption on PV systems to PV system importers and PV service providers approved by Suruhanjaya Tenaga, for products they import for supply to their clients (3rd party users), instead of only to the end-users.
- ii) Commercial applications can continue to claim Investment Tax Allowance (ITA) in addition to the normal Capital Allowance (CA) on investment in as was approved under Budget 2008.

Please visit <http://www.mbipv.net.my/C3GI.html> for more information on these incentives.

Recipients of 5th Call for SURIA 1000

List of successful recipients is as of 1st July 2009. Complete list of recipients will be announced on MBIPV website by 15th July 2009
